## Hello World.

I'm Seamus – a web developer with experience in both front-end development and graphic design. I have been professionally working building websites since 2018. I pride myself on being a fast learner and always seeking out new opportunities to improve my skills. My strong attention to detail and dedication to delivering quality work make me an asset to any project.

## WORK EXPERIENCE

2019 - Current

### Web Developer

Design Barn (freelance)

[designbarn.co.uk](https://designbarn.co.uk)

2018 - Current

### Web & Graphic Designer

Open House (in-house), Bangor NI

[openhousefestival.com](https://openhousefestival.com)

**Design Barn** is my freelance business. Generally I work with clients on every step from deciding on a domain name and setting up their hosting and emails to delivering a finished website and aftercare/support including video tutorials of how to use their site. I've had clients ranging from a university-led engineering project to charitable organisations and cafes.

I've been with **Open House**, a venue, festival and events non-profit, as their web and graphic designer since 2018. I am responsible for designing and maintaining their websites and handling all of their graphic design needs, including creating event posters and social media content.

**The Court House** opened as a venue in October 2022 and the website is the work I'm most proud of. I designed the brand colours, fonts and style, and built the website around it. The main challenge was building an events calendar system that my colleagues could use and update themselves. I worked hard to make the site accessible, fast and have good SEO - with a focus on event schema.

## SKILLS

### Front End Web Development

- Proficient: HTML, CSS, Js, Tailwind, Bootstrap, Git, Wordpress
- Currently learning: React, Svelte, PHP
